

# GRIDMAT™

## PORTABLE FLOORING

Gridmat is a technically advanced, cost effective portable flooring system. Lightweight, hard wearing and easy to install.

The applications for Gridmat are virtually endless. Currently a top selling product in the USA and Australia - Gridmat is used in the following industries:

- Marquee hire
- Stadium protection
- Machine shops
- Food Processing Factories
- Trade Fairs or Promotional Events
- Outdoor events
- Processing plants
- Construction sites
- Assembly Plants
- Motorsport

**GRIDMAT IS THE ULTIMATE PORTABLE FLOORING SOLUTION**

# GRIDMAT IS THE ULTIMATE PORTABLE FLOORING SOLUTION

## GRIDMAT<sup>TM</sup>

### PORTABLE FLOORING

Gridmat is widely used in stadiums turf protection, temporary areas, marquees, shows and display areas. Gridmat tiles are easily snapped together and disassembled without any tools. Due to its unique design power cables can safely travel under the flooring so machinery can be placed anywhere without the restriction of power point accessibility. OPEN GRID style Gridmat can also be used as a semi-permanent surface on grass as it allows growth through the holes in the surface. The grass can even be mown!

Gridmat is a patented injection moulded product manufactured from superior quality, high impact, UV stabilised polypropylene. It is extremely strong - a 2 tonne vehicle can be driven over it with ease.

Gridmat is available in two tile versions - OPEN GRID and CLOSED GRID. Edging is available to provide a gentle slope up to the flooring level.
