

UNIQUE design

PROVEN performance

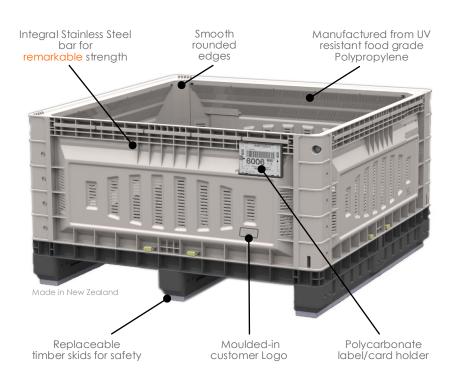

INNOVATIVE engineering

The TCI Design Team worked closely with leading industry specific experts identifying key areas that would substantially improve the performance of plastic harvest bins.

Drawing on the latest design and FEA software our team modelled and simulated **SureStore**'s harsh working conditions.

The final product delivers superior performance and strength that will substantially improve fruit quality and raise hygiene, operating and safety standards:

- 4 integrated moulded-in stainless steel beams that minimise side flex like no other bin on the market.
- No special stropping required.
- Timber skids to reduce slippage for improved safety.
- Modular design dramatically lowers freight cost by approxi. 50%.
- Modular design also means that damaged components can be easily and cost effectively replaced thus extending service life.

SureStore is an innovative product engineered from the ground up to meet some very demanding requirements.

SUPERIOR performance!

Integral Stainless Steel bar for **remarkable** strength

Polycarbonate label/card holder

Smooth rounded edges

Replaceable timber skids (for safety)

Moulded-in customer Logo

- UV Resistant Polypropylene
- Vented
- Robust and sturdy
- Modular design (easy to repair/replace parts)
- Stainless Steel reinforced sides minimal Lateral Flexn(5mm at 230kgf)
- No special stropping required
- Timber skids
- Smooth rounded edges
- Antibacterial

- Durable PC label holder
- Embossed customer/brand name plate (42mm x 80mm)
- Multi-stack (up to 12 bins high)
- Capacity: 625 litres
- Freight efficient (reducing costs by approximately 50%)
- Proven track record
- Recyclable
- Proudly New Zealand made and owned

Produce Bins available in your choice of colours — minimum quantities apply. Customer logo option.
